

Decora Evolve is a modular switch and outlet system designed to give homeowners more flexibility and control over their electrical features. Standard-wired base units are installed during construction, creating a foundation that can be customized with interchangeable modules.

With Decora Evolve, compatible modules can be swapped in seconds without special tools or turning off the power. This allows homeowners to easily add new features and adapt their switches and outlets as their needs change.

Benefits of Decora Evolve Outlets & Switches

- **Easy Customization:** Swap compatible modules in seconds without special tools or electrical know-how.
- **Smart Home Options:** Add smart switches and dimmers for app and voice control of your lighting.
- **Added Convenience:** Choose from USB charging, motion sensing, guidelights, and other useful features.
- **Flexible for Your Lifestyle:** Customize different areas of your home based on how you actually use each space.
- **Built to Evolve:** Update compatible modules as your needs and technology change without replacing the entire switch or outlet.
